SUMMARY

I am a newly trained Quality Assurance Tester, proficient in all sorts of manual testing techniques, working in Jira and other test related software, like Postman or Git. I am trained in programming, usually using C/C++ or HTML + CSS, can work with databases using SQL if needed and I have some programmer traits in me like: an obsession with being efficient, quick learner, and tech savvy.

PERSONAL PROJECTS

Vending Machine Application

I simulated a vending machine in C and made test cases on it in Jira.

- Worked on developing the code and fixing the bugs.
- Tested the application.
- Wrote the test cases and bug reports for it.

Personal Website Project

I coded my own personal website, and tested it.

- Coded the site from scratch.
- Tested the site.
- Made Jira tickets detailing the testing and the bugs found.

Group Project as Team Leader

I was assigned the role of Team Leader in a group assignment during my training at GoIT.

- I managed my teammates workflow and delivered a good final product.
- Verified the work done by my teammates to ensure it is of the requested quality.
- Resolved the problems that arose during our work together.

EDUCATION

License of Engineering in Automation and Informatics

Institution: "Aurel Vlaicu" University in Arad
